ACCOUNTS SOLICITED

The First National Bank of Chicago

Invites the Accounts of Banks and Bankers

The record of forty-eight years' consistent, conservative banking; the increase of capital and surplus to $20,000,000 and the growth of deposits to over $123,000,000, together with the service and facilities afforded, make this invitation worthy of careful consideration.

FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF JUNE.

Things took on a hopeful aspect during June. This was due to the political developments, more especially the overthrow of Mr. Roosevelt in his fight for the Republican Presidential nomination, and the re-nomination of Mr. Taft. It was also, however, aided by other circumstances. Crop news was decidedly more assuring, particularly in contrast with the inauspicious conditions in the agricultural world prevailing during the month preceding. Accounts regarding the cotton crop improved very much with the receding of the water from the submerged lands in the Mississippi Valley and the cessation of rains in those Southern States east of the Mississippi River which had previously suffered from excessive precipitation. Furthermore, reports regarding the iron and steel trades became still more roseate under continued activity and growing consumptive wants. This last feature led the latter part of the month to a pretty general marking up of prices for finished steel, and it was reported that the inquiry was so urgent that bonuses were offered for quick delivery.

The monthly statement of the United States Steel Corporation given out June 10 showed a further increase during May in the unfilled orders on the books of the subsidiary corporations, bringing the aggregate of unfilled orders May 31 up to 5,750,983 tons. The "Iron Age" of this city reported pig iron production for May at 2,512,582 tons, or the largest since March 1910, and comparing with 2,375,436 tons in April 1912, 2,405,318 tons in March, 2,100,815 tons in February and 2,057,911 tons in January. The latter part of the month the different steel makers added $1 a ton to the prices asked for steel bars and for steel plates and structural shapes—bars being raised from $1 20 per 100 lbs. to $1 25 and plates and structural steel from $1 25 to $1 30 for 100 lbs. The advance followed entirely as a result of the fact that the demand for iron and steel products was exceeding the supply. There was no concerted movement to advance quotations. The independent companies, more particularly the Jones & Laughlin Steel Co., the Republic Iron & Steel Co. and Cambria Steel Co.., took the initiative, and the United States Steel Corporation then followed. The higher prices either went into immediate effect or became effective July 1, and applied, of course, entirely to new business; all the companies carried large unfilled orders on their books taken months previously at much lower figures.

The improvement in steel prices has been continuous all through the half-year which ended with June, and contrasted with the extreme low prices reached in Nov. 1911, when steel bars were quoted at $1 05 per

100 lbs. and plates and structural steel at $1 10, there has been altogether an improvement of $4 a ton. In June last year steel bars were still quoted at $1 25 and plates and structural steel at $1 35, but that was just before the great break in prices occurred, and quotations then were not adhered to—in fact, were only nominal. Many other forms of steel were also advanced in June. Steel billets at Pittsburgh were marked up $1 a ton to $21 50, and in some cases, it was reported, $1 to $2 a ton additional was paid for prompt delivery.

Higher wage scales were announced for iron workers in some instances. The Republic Iron & Steel Co. agreed to the wage schedule proposed by the Amalgamated Association of Iron, Steel and Tin Workers for the year beginning July 1, under which there is to be an advance of 25 cents a ton in the rate for puddling, making the base rate $5 25. The Western Bar Iron Association also signed for the advance in rates. It was stated that about 15,000 skilled employees were affected by the increase.

Chairman Gary of the U. S. Steel Corporation sent a circular letter to the stockholders of the Corporation announcing that the finance committee had passed resolutions declaring that seven-day labor should be eliminated and the 12-hour day reduced as far as possible. This was in pursuance of a resolution adopted by the Committee on April 23 1907, and was also in line with the recommendations of the special investigating committee headed by Stuyvesant Fish, which made its report two months previously—in April. It was understood, however, that the change would have to be slow and that it would mean a heavy increase in the expenses of the Corporation.

Copper prices further advanced. The statement of the Copper Producers' Association issued June 7 showed another decrease in the stocks of marketable copper in this country, bringing the aggregate down May 31 to 49,615,643 lbs., against 165,995,932 lbs. on May 31 1911; and the European visible supply also registered a further diminution, making it May 31 99,944,320 lbs., against 162,653,120 lbs. twelve months before. The price of the metal got close to 18c. a lb., quotations at the end of June being 17¾c. for Lake copper and 17⅝c. for electrolytic copper—the highest figures for five years.

We have referred above to the better outlook for cotton. In Texas, especially, the prospects appeared highly encouraging. The course of prices of the staple was somewhat irregular. The first half of the month, with many of the States east of the Mississippi still getting too much rain and Texas somewhat in need of rain, the tendency of prices was upward, but the latter half the movement was downward, and the decline was accelerated by the appearance on June 19 of the annual acreage report of this newspaper, showing only a nominal decrease in acreage, taking the cotton belt as a whole. The report of the Department of Agriculture issued June 4 and showing the condition May 25 made the average only 78.9, against 87.8 at the corresponding date in 1911 and a 10-year average of 81.5; but this had comparatively little effect, as private advices indicated that a decided change for the better had occurred in the outlook in the interval. Middling upland spot cotton in this market, after declining from 11.50c. May 31 to 11.40c. June 1, advanced to 11.90c. June 15, then fell off to 11.55c. June 24 and closed at 11.65c. June 29. Print cloths at Fall River ruled throughout at 3 15-16c.

Notwithstanding the improved agricultural outlook, the course of grain prices was decidedly irregular; wheat at first tended downward, but there followed a strong upward reaction. One reason was that temperatures over most of the grain-growing regions were too low to permit rapid growth, particularly in the Northwest. The record of the Weather Bureau in the Twin Cities shows that June 1911, when the spring-wheat crop suffered such serious damage, was the hottest June known in that section, while, on the other hand June 1912 was the coolest in the history of the Bureau. At the very close of the month reports came of damage from dry, hot weather in the Dakotas and Minnesota, and also in Canada, where temperatures from 95 to 100 were said to have been recorded. The Agricultural Bureau at Washington in its report June 10 giving the condition on June 1 showed a further deterioration of 5.4 points in winter wheat during May, making the average only 74.3, or the lowest at this date since 1895, but spring-wheat condition was stated as unusually high, namely 95.8; the acreage of both spring wheat and winter wheat being much smaller than in 1911. The July option for wheat in Chicago declined from $1 11⅛ June 11 to $1 04½ June 19 and then recovered nearly the whole of its loss, but declined again June 29 with the close $1 08⅝. The July option for corn at Chicago, after dropping from 74⅞c. June 1 to 70⅝c. June 19, advanced again and touched 76c. June 28, with the close June 29 75¼c. July oats rose from 47½c. June 1 to 52⅛c. June 10, then dropped to 47⅜c. June 19 and closed at 48⅛c. June 29.

There was again complaint of the high prices of meats, which further advanced. As a result of the agricultural shortage the previous year, all grades of feed stuffs ruled high during the winter, and this was now reflected in the prices of meats. Both Chicago and Kansas City reported cattle at the highest prices ever reached in the history of the stockyards. In this city in the Jewish quarters of the East Side the high prices of meats led to attacks on the retail butcher shops by the Jewish women, who attempted to make the meats unfit for use by saturating them with kerosene.

The foreign exchange market, after some weakness the first few days of June, due to lower European discounts, developed a hardening tendency, which continued until about the 20th of the month. Short covering for speculative account was in part responsible for the upward tendency, and there was also more or less demand for exchange on tourists' account, but in the main the rise was due to the 1st of July remittances on interest and dividend account. The Bank of Germany on June 11 reduced its discount rate from 5 to 4½%. Private discounts, however, indicated firm money markets, and there was some skepticism as to whether the lower Bank rate could be maintained in view of the urgency of Germany monetary requirements in connection with the settlements at the end of June. But Germany succeeded in obtaining considerable gold in London—the Bank of England selling £501,000 gold for German account the second week of the month, the same amount the third week and £352,000 the last week of the month. France also was evidently extending aid. At all events, $4,000,000 gold was taken from New York for export to Paris the last week of the month; and, while the shippers, Lazard Freres, would not disclose the purchaser of this gold, it was quite generally assumed that it was intended to reimburse the Bank of France for withdrawals from France for the German market. The last steamer from this side that could carry remittances to Europe in time for the July payments sailed on June 20, and from that date on exchange rates began to decline. It also became apparent as the month closed that the crisis feared in Germany money requirements at the end of the quarter had been averted, though contangoes for the quarterly settlement were quoted at about 6%, a figure not reached at this period of the year since the 1907 panic. Open market discounts at Berlin eased off at the close. The gold shipments to Paris, which were special operations and not justified by exchange rates, also tended to reduce the demand for exchange.

30			SUNDAY		

The course of the stock ma ket was irregular during June. At first the market was decidedly strong and several issues made sen ational advances. Then the market became inactive and later weak and soft, with stocks like Reading and Lehigh Valley, which previously had been prominent for a large rise, now conspicuous for a marked decline. In the week of the Republican Convention speculation was at times almost at a standstill, awaiting developments at Chicago. When it was seen that Mr. Roosevelt was doomed to defeat and Mr. Taft's renomination certain, pretty general improvement set in. The news from the Democratic Convention at Baltimore the last week of the month was not so exhilarating, but the improvement continued, though the copper stocks at times evinced a weakening tendency. There was a big slump in the price of New York Ontario & Western shares on the passing of the dividend.

There was no great change in our local money market. The undertone was somewhat firmer, mainly as the result of a more cheerful mercantile sentiment, and it is to be noted that the offerings of commercial paper were in better supply. Rates for paper were marked up and there was likewise a fractional advance in the rates for time loans. The gold shipments to France and the large absorption of cash by the U. S. Treasury in the collection of the Corporation Income tax operated to reduce the money holdings and surplus reserves of the Clearing House banks and trust companies the last week of the month.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed "*Price about January* 2 1912" were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed "*Interest Period*" indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

Bonds.	Bid.	Ask.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Stamped stock. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

b New stock. *d* Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Ex-stock div. *x* Ex-div. *y* Ex-rights.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column *"to net"* indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

Bonds	Bid.	Ask.	To Net.

f Flat price. *b* Basis. Stamped 2½% until Dec. 1 1906. *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF JULY.

Except for the political situation, the developments during July were very favorable, and definite progress towards further improvement, both in the agricultural and the industrial world, was made. The political happenings were not altogether assuring, and yet their portend was difficult to discern. In the Democratic National Convention Mr. Bryan achieved a notable triumph. The deadlock in the Convention which had existed when the month opened was broken on the 46th ballot taken July 2nd. Governor Woodrow Wilson of New Jersey was then made the candidate of the party for President. The result was entirely due to the attitude taken by Mr. Bryan. On the 10th ballot, taken the previous Friday night (June 28), the Speaker of the House of Representatives, Champ Clark, with the aid of the 90 votes of the New York delegation, had succeeded in getting an aggregate of 556 votes, or considerably more than a majority, but as a two-thirds vote is required in Democratic Conventions this was not enough to nominate.

It was then that Mr. Bryan, sore because he had not received the support of the Clark people in his contest on the temporary chairmanship, intervened for the defeat of Mr. Clark. He had been voting for Clark in accordance with instructions from the Nebraska Democrats, but on the 14th ballot he changed his vote to Wilson, and made a speech in which he bitterly assailed the New York delegation, charging it was under the domination of Morgan, Ryan and Belmont, and said he would not participate in choosing any nominee whose nomination depended upon the vote of the New York delegation. He also intimated that if any candidate, no matter who, should get the nomination by the vote of New York, he would not support him. The Clark vote at once began to fall off, while that of Wilson kept gaining, and with Mr. Bryan persisting in his course and declaring that only a man of radical views should receive the endorsement of the Democratic Party, Mr. Wilson eventually got the nomination and Governor Thomas R. Marshall of Indiana was nominated for second place on the ticket. A radical platform was also adopted. It was supposed at first that the nomination by the Democrats of a man so prominently identified with the extremists would abate Mr. Roosevelt's desire to set up an independent party, but Mr. Roosevelt went ahead deliberately with his plans for putting in the field a third ticket. It thus became evident that there was to be a triangular contest, leaving things decidedly unsettled and the outlook very uncertain.

There was a disposition, however, to ignore political disturbances in view of the favorable promise in the

agricultural world and the gradually widening circle of business activity. One exception is to be noted with reference to the improved crop prospects, namely in the case of cotton, where high temperatures in Texas, with too much rain east of the Mississippi, served to impair the prospects of the growing crop. The injury done here from adverse meteorological conditions was undoubtedly greatly exaggerated. Yet the effect was to bring about a marked rise in the price of the staple, middling upland spot cotton in this market advancing from 11.50 cts. June 30 to 13.40 cts. July 29, with the close July 31 13.20 cents.

Aside from cotton, the agricultural outlook became steadily more assuring and all the indications pointed to an unusually large yield of spring wheat, of oats, of hay, of corn, and of many other things, though in the closing part of the month extremely high temperatures over important areas in the Central West led to some fears of damage from that source. The hopeful outlook was reflected in a sharp decline in grain prices. The September option for wheat in Chicago declined from $1 05\frac{3}{4}$ cents July 1 to $91\frac{3}{4}$ cents July 22, with the close July 31 93½ cents. The September option for corn dropped from 73 cents July 1 to 63¼ cents July 22, with the close July 31 $65\frac{3}{4}$ cents. September oats at Chicago fell from $39\frac{7}{8}$ cents July 1 to $32\frac{3}{4}$ cents July 31. These declines followed in the main as the result of the auspicious conditions during July, for the report of the Department of Agriculture issued July 9, showing the condition July 1, was in some respects not up to expectations. For instance, the general average of winter wheat July 1 was given as only 73.3, the lowest at that date since 1899, and comparing with 76.8 in 1911 and a 10-year average of 80.2. On the other hand, however, the spring-wheat condition was put at 89.3, or 15.5 points higher than on July 1 1911 and 3.7 points above the 10-year average. The condition of oats July 1 was stated at 89.2, comparing with 68.8 July 1 1911 and 82.2 in 1910, and the condition of corn 81.5, against 80.1 on July 1 1911, with an increased acreage in both cases.

The growing activity in trade was noticeable in many different directions and followed in some measure as the direct result of the bright agricultural promise. In the dry goods trade there were many signs of activity. Higher prices were also noted. These higher prices were in part due to the constant advance in all descriptions of raw material, particularly cotton and wool; but they were also due to the fact that retailers' stocks had been allowed to run down to a low point and sorely needed replenishing while producers could not turn out goods as fast as wanted. The price of print cloths at Fall River was on the 27th raised from 3 15-16 cts. to 4 cts. At New Bedford a strike of weavers and other cotton operatives began July 15 and continued until the close of the month. Twelve mills became idle and 10,000 hands were involved. The strike was precipitated by the posting of notices in the various mills announcing a new system of grading the cloth to determine the pay of weavers. Seven other mills at New Bedford avoided a strike by agreeing not to put the new grading system into effect.

In the iron and steel industry the activity previously noted became still more pronounced. Instead of orders falling off they continued to increase. The report of the Steel Corporation, given out July 10, showed unfilled orders on the books of the subsidiary corporations June 29 aggregating 5,807,346 tons, an increase during June of 56,363 tons. The statement of the Steel Corporation for the quarter ending June 30, made public late July 30, showed net earnings of $25,102,265, as compared with only $17,826,973 for the quarter ending March 31, and there was a trifling surplus above the dividend requirements, as against a large deficit in the March quarter. There were further advances during the month in iron and steel prices. For instance, there was an advance of $2 a ton on black sheets or to 2.05 cents per pound for No. 28, $2 a ton on tin mill black plates (or to 2 cents) and $3 a ton on galvanized sheets, or to 3.15 cents for No. 28. There was also an advance in the price of wire of $1 per ton base and between $1 and $5 a ton on more highly finished forms; and of $2 a ton in all sizes of steel pipe and boiler tubes. Furthermore, there was another advance of one dollar a ton in structural steel, steel plates and steel bars, so that steel bars were quoted at $1 30 per 100 lbs. and structural steel and plates $1 35. For immediate needs the question of price was subordinated to that of delivery, and high premiums were paid for prompt shipment. Some increases in wages were also announced.

The stock market was irregular during July, but with a marked development of strength at the close. There was a firm tone even at the beginning of the month, with notable advances in specific cases, but this was soon followed by pretty general declines, on liberal offerings of stocks, the weakness being especially pronounced in the case of such speculative specialties as Reading, Union Pacific, Milwaukee & St. Paul, New York Central, Lehigh Valley, &c. Milwaukee & St. Paul dropped below par and the Steel shares were also weak. The last half of the month, however, the tendency was upward, influenced by the excellent promise for the growing grain crops and the continued development of business activity. Great Northern and Northern Pacific shares were leaders in the upward movement on the prospect of a bounteous harvest of spring wheat in their territory. At the close of the month the market was not only strong but transactions were on a greatly increased scale, the encouraging return for the June quarter submitted by the Steel Corporation, after the close of business July 30, exercising a stimulating influence all around.

The money market was distinctly firmer, and rates became dearer all around. The United States Treasury absorbed large amounts of cash, there were some gold exports, and the Clearing-House statement for July 6 showed a large deficit. The surplus was restored the next week and the tone temporarily again became easier, but this did not last, lenders taking the view that monetary conditions were such as to warrant improved returns for money. Mercantile paper at the close of the month, at least for maturities extending into the new year, was quoted on a 5% basis.

RATES FOR MONEY IN NEW YORK, WEEKLY.

		July 5.	July 12.	July 19.	July 26.
Call Loans –					
Stock Exchange—Range for week		2¾-3	2½-3½	2-3	2½-3
Average for week		2⅞	3⅛	2⅞	2¾
Time Loans—

Ninety days		3½	3½-3¾	3½-3½	3⅝
Four months		3½-3¾	3¾-4	3½-3¾	4-4¼
Five months		3¾-4	4-4¼	3¾-4	4-4½
Six months		4-4¼	4¼-4½	4¼	4½-4¾
Commercial Paper –					
Double names	Choice 60 to 90 days	4-4¼	4¼-4¾	4½-4¾	4½-4¾
Single names	Prime 4 to 6 months	4-4¼	4½-4¾	4½-4¾	4½-4
	Good 4 to 6 months	4½-4¾	5-5¼	5-5¼	5¼

Foreign exchange was generally strong up to July 25, but after that a sharp and rapid break in rates occurred. Lazard Freres engaged $4,000,000 more gold for Paris at the beginning of the month. These shipments, however, were special transactions and not warranted by rates of exchange; $2,000,000 gold was also exported to Canada. There was a steady and persistent advance in sterling. This was due mainly to the high discount rates prevailing at London, which advanced to above the official Bank of England minimum of 3%. These high discounts also operated most of the month to discourage the drawing of finance bills, which are usually looked for at this season of the year. On July 25 demand sterling reached the highest point in two years. Thereafter, however, a precipitate decline occurred, as open market discounts became easier.

ACTUAL RATES—BANKERS' AND COMMERCIAL BILLS.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

TRUST COMPANIES FOR WHOLE STATE OF NEW YORK.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed *"Price about January 2 1912"* were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue.* As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case On the other hand, we prefix the letter *"f"* where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, *"f"* appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Stamped stock. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked "*f*" indicate that accrued interest is included in the price. Prices not marked are "and interest" that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

a Purchaser also pays accrued dividend. *b* New stock. *d* Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Ex-stock div. *x* Ex-div. *y* Ex-rights.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column "*to net*" indicate the basis on which the securities sell or the interest rate which the securities if held to maturity, will net to the purchaser at the present market price.

Bonds	Bid.	Ask.	To Net.

f Flat price. *b* Basis. Stamped 2½% until Dec. 1 1906. *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF AUGUST.

The crops continued to make satisfactory progress, and cheerfulness and optimism remained the dominant note in trade circles. Politics and political discussions loomed large in the columns of the newspapers, but were relegated to a subordinate place in mercantile affairs, though in the financial world they were looked upon as involving important possibilities. The nominees of the two regular parties, namely President Taft and Governor Woodrow Wilson, delivered their speeches of acceptance and the advocates of the third-party scheme held a National Convention at Chicago, which was dominated in all of its work and activity by Mr. Roosevelt, and promulgated a platform of principles that met expectations in being radical in the extreme and nominated Mr. Roosevelt himself as a candidate for President and Governor Hiram W. Johnson of California as a candidate for Vice-President. The new party adopted the name of the National Progressive Party.

Mr. Taft's declarations in his speech were satisfactory and assuring, inasmuch as they laid special stress on the fact that the Presidential contest the present year was a campaign for the maintenance of our institutions and for the preservation of the Constitution, this being termed the supreme issue confronting the voters. Governor Wilson's speech also had a conservative note in it, for he expressed himself with a good deal more caution than had been looked for on some of the leading issues of the day, For instance, with reference to a revision of the tariff he said: "When we act we should act with caution and purdence, like men who know what they are about, and not like those in love with a theory. It is obvious that the changes we make should be made only at such a rate and in such a way as will least interfere with the normal and healthful course of commerce and manufacture." With reference to combinations of capital he said he was not one of those "who think that competition can be established by law against the drift of a world-wide economic tendency", nor was he one of those "who believe that business done upon a great scale by a single organization—call it corporation, or what you will—is necessarily dangerous to the liberties, even the economic liberties, of a great people like our own, full of intelligence and of indomitable energy."

There was a distinctly favorable development in the fact that Congress had at last terminated its work and definitely adjourned. Adjournment was delayed again and again, and after first continuing the previous year's appropriations for the necessary operations of the Government so as to cover the first half of August,

Congress was later obliged to extend the time until the close of the month. Adjournment came on Monday, Aug. 26. Congress had been at work since the preceding December and hence the session ranks among the longest on record. Speaker Clark said that, while there are a few sessions which have exceeded it in length, he believed that Congress had been actually in session more days since the first Monday in December than any other Congress that had ever sat. Much of the delay at the close was due to the fact that Congress undertook to graft new legislation on the appropriation bills which President Taft could not approve, making it necessary to send the bills back with his veto and obliging that body to repass the measures with the objectionable features eliminated. There were also points of difference between the two Houses regarding legislative measures of large importance, which differences conference committees found it difficult to adjust.

Even before Congress definitely adjourned it became evident that all measures for a radical revision of tariff duties must fail, owing to the opposition of President Taft. This was looked upon as a hopeful circumstance by those who regard tariff changes of any kind as disturbing to business interests. A conference bill on the wool schedule of the tariff was agreed upon by the two Houses of Congress early in the month, identical with the compromise bill passed by Congress in 1911 and vetoed by the President. Mr. Taft again vetoed the scheme (Aug. 9) but on Aug. 13 the House of Representatives passed the bill over the veto by a vote of 174 to 80, 21 Republicans having joined with the Democratic majority. On the 16th, however, the attempt to pass the bill over the veto failed in the Senate, a two-thirds vote being necessary for this purpose, whereas the actual vote was only 39 to 32, notwithstanding six Republican Insurgents voted with the Democrats, namely Senators La Follette, Bristow, Clapp, Crawford, Poindexter and Works The bill revising the metal schedule met with a similar experience; on the 3d inst. the Senate receded from certain amendments to which the House would not agree and the bill was then passed and went to the President, who vetoed it Aug. 14. The House repassed it by a vote of 174 to 83, 16 Republicans voting with the Democrats, but in the Senate the result on the motion to repass was 39 to 32—not a two-thirds majority.

The result of the vetoes in these instances made it clear that no tariff legislation could be completed at the present session and that therefore it was useless for Congress to send any more bills to the President which he did not approve. The bill revising the chemical schedule had been defeated in the Senate the previous month—July 3. The Underwood bill revising the cotton schedule passed the House Aug. 2 by a vote of 158 to 72 and the Senate Aug. 14 by a vote of 36 to 19, but the latter body added a provision repealing all sections of the Canadian Reciprocity Act except those which permit the free entry of print paper and wood pulp, and the bill therefore did not reach the President.

The President's veto of other measures also proved successful. He vetoed the Legislative, Executive and Judicial Supply bill twice—the first time because it would abolish the United States Commerce Court and also because it fixed the tenure of Government clerks in the Civil Service at 7 years. An attempt at this time to override the veto failed in the House on Aug. 15 by a vote of 153 to 107, being less than the necessary two-thirds. The bill was sent to the President with the Civil Service restriction eliminated, but with the provision abolishing the Commerce Court retained. Another veto was the result, but this time the House was successful in repassing the bill, the vote being 154 to 53. In the Senate, however, the necessary two-thirds was lacking, the vote being 34 to 27. The bill was finally sent to the President with an appropriation for the continuance of the Commerce Court until March 4 1913, in which shape it received his signature. The Army appropriation bill, which the President had vetoed in June because of objectionable features therein, was also changed so as to meet the views of the President, and particularly by the elimination of the provision which would have legislated Major-General Leonard Wood from his office of Chief of Staff of the Army. The President was not successful in saving the Tariff Board, as the Sundry Civil Appropriation bill came to him with the provisions for the maintenance of the board stricken out. In the case of the Naval Appropriation bill, the Democrats of the House of Representatives held a new caucus (the 5th) and abandoned their program of "no battleships" so far as to allow Democratic members to vote for one new battleship; the bill in that shape reached the President and was signed by him, the Senate having yielded its demand for the building of two new battleships.

As already noted, the leading crops made satisfactory development. In the case of cotton the Department of Agriculture after the close of the month showed a slight decline in condition, but it became so apparent from week to week that, barring an early frost, the crop would be a large one, even if not up to that of the previous season, that prices sharply declined, and middling upland spot cotton in this market August 30 was quoted at only 11.25 cents, against 13.20 cents July 31. In the grain markets, also, the tendency of prices was downward except in the case of the September option for corn. In this last case, owing to the strength of the statistical situation, bear operators were forced to cover their outstanding short contracts and September corn at Chicago advanced from 65⅝ cts. August 7 to 74¾ cts. August 30, with the close August 31 72¼ cts.; the December option closed August 31 at only 55 cts. (17 cts. less, it will be observed, than September corn), against 57¼ cts. July 31. December wheat at Chicago closed August 31 at 93 cts., against 95⅜ cts. July 31, and December oats at Chicago 32¼ cts., against 34¼ cts.

The Bank of England August 28 advanced its rate of discount from 3 to 4% and in this country also money rates stiffened all around. One feature was the sudden calling of outstanding demand loans by Canadian banks and the last week of the month $2,600,000 gold was taken here for shipment to Canada. There was renewed demand by Germany for American loans in this market and Berlin bid 4¾% per annum for 3 months' loans, but secured comparatively little money at this figure on the dollar basis—that is, the money being specifically repayable in dollars so as to obviate any risk to the lender from the fluctuations in exchange. New York City banks completely withdrew as buyers of mercantile paper. Though discount rates at London advanced, a number of large speculative accounts were the latter part of the month transferred from New York to London as a result of the prospect (as distinct from the actual situation) of relatively easier carrying charges expected to be available later on at the British centre. There was also considerable borrowing by New York Stock Exchange commission houses in that market by means of 90-day finance bills.

RATES FOR MONEY IN NEW YORK WEEKLY.

	Week ending—				
	Aug. 2.	Aug. 9.	Aug. 16.	Aug. 23.	Aug. 30.
Call Loans—

Good 4 to 6 mos.	5¼	5½	5½-6	5½-6	5½-6

Foreign exchange see-sawed a good deal, with prices moving alternately up and down within a narrow range. At the beginning of the month there was weakness on the drawing of 90-day bills in anticipa-

tion of the cotton movement, then there was a sharp recovery on short covering by speculative interests, only to be followed by renewed weakness on the further drawing of finance bills. The continued negotiation of these finance bills finally led to the advance in the Bank of England minimum from 3 to 4%. This and the higher discounts in the open market restricted new offerings of finance bills and caused an advance in exchange, but at the close there was a downward reaction again, owing to the transfer of Stock Exchange loans from this side to London and also by the selling abroad of a block of $5,000,000 New York City 90-day revenue bonds.

On the Stock Exchange the tendency of prices was towards a higher level, but there was no uniform advance and the upward movement was not uninterrupted. Indeed, at one time the market sagged and prices of some of the leading speculative shares made sharp declines. The enactment of the Panama Canal bill seemed to be the occasion for this particular period of weakness, owing mainly to the provision in the bill forbidding ownership or control by any railroad of water lines operated through the Panama Canal *or elsewhere* with which such railroad does or may compete. The market quickly regained its tone, owing to the favorable crop prospects and the continued activity of trade. The volume of business, however, remained very limited throughout, extreme dulness prevailing at times, due to the fact that large interests did not view the political outlook with complacency and for that reason were disinclined to enter into large engagements. Louisville & Nashville shares were a strong feature on the value of the rights in connection with the new stock issue.

CONDITION OF THE TRUST COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed *"Price about January 2 1912"* were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*

GENERAL QUOTATIONS
OF
BONDS AND STOCKS.

1. In the following thirty pages of tables, quotations are given for all the more important securities listed on any Stock Exchange in the United States; also for leading unlisted and inactive securities.

2. Quotations from all Stock Exchanges are as near as possible for the *closing day of the month preceding the date of issue*. As the New York Stock Exchange began with Jan. 2 1909 to quote all bond prices "and interest," we have adopted the same method, and no longer employ a designating mark to indicate the fact except where there is a deviation from this rule. The reader will understand, therefore, that unless the letter "*f*" is prefixed to the price, he must pay accrued interest *in addition* to the price. This, however, does not apply to income bonds or bonds in default, in which cases the price includes the interest, should there be any.

3. The letter "*f*" prefixed to bond prices denotes that the quotation is a flat price—that is, that the accrued interest forms part of the price, and therefore the purchaser does not have to provide for it separately in making payment. As already stated in the case of income bonds and bonds in default, the price is always "flat," and no designating mark is employed to indicate the fact.

4. Stock prices marked thus (*d*) are per share. All others are per cent except bank stock prices, which are quoted per share unless otherwise stated.

5. It should be borne in mind in the use of these tables that the quotations for many inactive and unlisted securities are merely nominal, but in all cases the figures are obtained from sources which are considered reliable.

6. The following abbreviations are often used, viz.: "M" for mortgage, "g" for gold, "g'd" for guaranteed, "end" for endorsed, "cons" for consolidated, "conv" for convertible, "s f" for sinking fund, "l g" for land grant, "op" for optional.

7. The black-faced type in the letters showing the interest period indicates the *month* when the bonds mature.

NOTICE.—All bond prices are now "and interest" except where marked "f" and income and defaulted bonds.

STREET AND ELECTRIC RAILWAYS

In quoting street and electric railway bonds, we employ the same method as in quoting the bonds of steam railroads. The great majority of issues being quoted "and interest," we use no designating mark whatever where that is the case. On the other hand, we prefix the letter "*f*" where there is a deviation from this rule; in such cases the interest forms part of the price. Unless, therefore, "*f*" appears against a quotation, the buyer will understand that the accrued interest is to be added on. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where marked "f," and income and defaulted bonds.

d Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Stamped stock. *x* Ex-dividend. *y* Ex-rights.

MISCELLANEOUS SECURITIES.

Quotations marked *"f"* indicate that accrued interest is included in the price. Prices not marked are "and interest"; that is, purchaser has to pay accrued interest in addition to the price. This, however, does not apply to income bonds and bonds in default, in which cases the price takes account of the interest and no designating mark is employed.

NOTICE.—All bond prices are now "and interest" except where Marked "f" and income and defaulted bonds.

a Purchaser also pays accrued dividend. *b* New stock. *d* Price per share, not per cent. *k* Last sale. *n* Nominal. *s* Sale price. *t* Ex-stock div *x* Ex-div. *y* Ex-rights.

STATE AND MUNICIPAL BONDS.

It is not the custom in quoting municipal bonds to include accrued interest in the price given. Hence this accrued interest must in all cases be added on. There are a very few instances which form exceptions to the rule—that is, where the prices given are flat prices, the accrued interest having been taken into account in making them. These are indicated by a special mark, thus (*f*).

The figures in the column *"to net"* indicate the basis on which the securities sell or the interest rate which the securities, if held to maturity, will net to the purchaser at the present market price.

Bonds	Bid.	Ask.	To Net.

f Flat price. *b* Basis. Stamped 2¼% until Dec. 1 1906 *n* Nominal.

BANKS AND TRUST COMPANIES.

Quotations in this department are given per share, not per cent, except for stocks of New York City, Brooklyn and Canadian institutions, and are as near as possible for the *closing day of the month preceding the date of issue*, though often are nominal. An asterisk (*) denotes sales. The letter (*h*) prefixed to a price indicates that the figures show the book value.

Figures of deposits, capital and profits for the national banks are from the Comptroller's last call; for all other institutions they are the latest obtainable, direct returns being procured by us where no periodic statements are required. For the Clearing-House banks of New York, Philadelphia and Boston, deposits are taken from the latest weekly statement.

Where Names are Printed in Italics Fuller Returns may be Found in the Advertising Columns

WILLIAM B. DANA COMPANY, *Publishers,*
FRONT, PINE AND DEPEYSTER STS., NEW YORK

REVIEW OF SEPTEMBER.

The month of September was devoid of important new developments of moment. In trade circles there was a continued disposition to ignore political considerations, with a further broadening of activity in all lines of business. Even the stock market fell in line and the latter part of the month recorded a growing volume of business at rising prices, the tone at times becoming buoyant.

The September elections in Vermont and Maine, which had been looked forward to with much interest, did not have any effect on affairs. They threw no light on the probable outcome of the Presidential contest in November. In the Vermont gubernatorial election the Roosevelt Progressive party succeeded in splitting the Republican vote, and as a consequence there was no choice by the electorate. This throws the election into the Legislature, where the regular Republicans at the same election succeeded in retaining control, thus insuring the election of the Republican candidate for Governor. The Democratic vote showed some increase as compared with the elections in other recent years. The Roosevelt candidate, who some had feared might get an absolute majority of all the votes cast, was left third in the race. At the Maine election for Governor the regular Republicans and the Rooseveltites had united in support of the same ticket and accordingly succeeded in preventing the re-election of the Democratic Governor (Frederick W. Plaisted) who in 1910 had been swept into power when the Democrats carried Maine for the first time in thirty years.

An interest political development of the month was the action of the Democratic State Convention in Wisconsin in adopting a platform and nominating a candidate pledged to the repeal of the State Income Tax Law. This law was enacted earlier in the year and no tax has yet been levied under it, but it has aroused intense opposition in the State on the part o nearly all classes of the population. Even in the Republican Convention strong hostility against the measure was manifested and a wing of the party opposed the law. In their platform the Republicans assert that "the law is right in principle and should be given a fair trial", but defer to public sentiment to the extent of declaring that "its administration should be simplified to the end that the citizen may not be put to unnecessary trouble and expense." The action of the Democrats was taken as indicating a drift away from radicalism.

All the generally accepted trade indications pointed to an increasing volume of business and in many cases the figures showed that the best previous records

of business were being broken. In the iron and steel industry demand continued greatly in excess of supply and large premiums were paid where shipments could be obtained for immediate delivery. The monthly report of the Steel Corporation issued September 10 indicated a further increase of 206,296 tons in the unfilled orders on the books of the constituent companies during the month of August, bringing the aggregate of these unfilled orders up to 6,163,375 tons, at which figure comparison was with only 3,695,985 tons twelve months before, on August 31 1911.

The August production of copper in the United States proved the largest in the history of the trade, amounting to 145,628,521 lbs., as against 137,161,129 lbs. in July and comparing with only 125,493,667 lbs. in August of the previous year. Notwithstanding this enormous output the stock of marketable copper in the United States at the end of August was 3,579,047 lbs. less than at the beginning of the month. The Anaconda Copper Co., of whose $108,312,500 stock the Amalgamated Copper Co. owns $76,875,000, increased its quarterly dividend from 2%, the rate prevailing from July 1908 to July 1912, to 3%. The United States Smelting Refining & Mining Co., which had been paying 1% quarterly from January 1908 to July 1912, increased the quarterly distribution to 1½%.

The Lake Superior August shipments of iron ore were reported the highest of any month in the history of the trade. The anthracite coal shipments, too—all these figures were made public the first half of September—were in excess of any previous period not only for the month of August, but for any other month. In the case of our foreign trade the story was the same, and new high records for the period were established in August in the case of both the imports and the exports.

Railroad earnings shared in the prevailing trend and indicated an increasing volume of traffic. A number of the statements of large companies for the month of August, made public towards the close of September, showed not only very large gains in gross earnings but some of them also in net earnings, this latter being considered an especially favorable development in view of the higher wage schedules and the general rise in operating cost.

All this engendered a very hopeful feeling in all directions and under the circumstances it cannot be deemed surprising that very little consideration was given to the political outlook. At the same time the promise of a large and bounteous agricultural yield throughout the country became a definite certainty. The monthly report of the Agricultural Bureau at Washington regarding the growing grain crops was issued September 9, bringing the condition down to September 1, and proved in the highest degree encouraging—contrasting sharply in this respect with the situation twelve months before, when the agricultural yield was extremely poor. The condition of corn on September 1 was stated by the Department as 82.1, as against 80 a month earlier, and comparing with only 70.3 on September 1 1911. The condition of spring wheat at harvest time was given as 90.8, as against only 56.7 at harvest time in 1911 and 63.1 in 1910. Oats condition at harvest was reported 92.3, against 90.3 on August 1 the present year and comparing with 64.5 on September 1 1911. Potatoes and nearly all other important crops made a similarly favorable comparison with previous years. During September the weather continued favorable, and though very low temperatures were registered the latter part of the month, with reports of frost in certain localities, it is not believed that any important damage was done to the maturing corn crop.

The receipts of wheat, particularly in the spring-wheat regions, reached enormous dimensions, and prices the latter part of the month tended strongly downward. The December option for wheat declined from 92⅝ cts. Sept. 5 to 89¼ cts. Sept. 27, with the close Sept. 30 89⅞ cts. December corn at Chicago fell from 55⅜ cts. Sept. 4 to 51⅜ cts. Sept. 12, then advanced again to 54¼ cts. Sept. 21 on rumors of damage from frost, but closed Sept. 30 at 52⅝ cts. December oats at Chicago, after advancing from 32 cts. Sept. 3 to 33 cts. Sept. 21, dropped to 31½ cts. Sept. 30.

The large crop movement, with the expanding activity in trade led, to an urgent demand upon the banks for accommodation, and a sharp rise in money rates ensued. The demand for funds was increased by the usual preparations for the large interest and dividend disbursements which always occur on the 1st of October. Call money September 25 got up to 7% and September 30 touched 7½%, while time accommodation at the close of the month was reported at 5¾@6% per annum on loans running 60 to 90 days; at 5¾% for 4 months' loans and at 5½ @5¾% on loans running 5 to 6 months. Mercantile paper commanded 6% both for double names and the best single names, while single-name paper not so well known could only be placed at 6½%. As money holdings of the Clearing-House banks and trust companies, which during the last two weeks of August had fallen from $451,704,000 to $432,050,000, were further reduced to $411,653,000 September 28, these institutions were obliged to call loans on an extensive scale. The weekly Clearing-House returns show that between August 31 and September 28 the loans of the Clearing-House banks and trust companies were reduced from $2,050,205,000 to $1,953,036,000. On September 7 the surplus cash reserves of these Clearing-House institutions was only $2,751,100, but, through the calling of loans and the consequent reduction of deposits, the surplus was slowly brought up again week by week and September 28 stood at $9,499,100. The deposits fell from $1,911,841,000 August 31 to $1,797,110,000 September 28.

Good 4 to 6 months	6	6	6	6 ½

The higher money rates here led to gold importations from Europe the latter half of the month. Altogether about $3,450,000 gold was taken in London the last two weeks for shipment to the United States. This gold formed part of the weekly offerings of South African gold in London. These engagements were special operations and did not appear to be entirely justified by the prevailing rates of exchange, but nevertheless the course of sterling was steadily downward throughout nearly the whole month, sight bills declining over a cent and a half per pound. The Bank of England did not part with any gold for American account and seemed disinclined to do so, but did meet an active inquiry for gold on German account. Germany needed the gold to prepare for the end of the quarter settlements on September 30. These settlements were looked forward to with much uneasiness in London, but owing to the extensive preparations made beforehand, they passed off without serious trouble. As far as the Bank of England is concerned, the advance in its discount rate made in August had the desired effect of controlling the situation.

The growing tension in the money market here served, of course, directly to weaken sterling exchange. Exceptionally heavy selling of cable transfers by leading international banking houses was reported, evidently for the purpose of lending the proceeds in this market. The placing of considerable amounts of New York City revenue bonds abroad tended further to weaken exchange. Some fairly liberal amounts of grain and cotton bills also came on the market.

The stock market the latter part of the month made a cordial response to all the favorable conditions noted above—the growing activity of trade, the excellent crop yields, the improving returns of earnings, &c., &c. At the opening September 3, after the Labor holiday, there was decided weakness with some decline in prices. A sharp recovery followed, but the course of values was more or less irregular the first two weeks of the month. For a time the strengthening of the money market, with the sharp rise in call loans, appeared to restrict operations, but the last half of the month the general course of values was strongly upward, and the volume of business steadily increased. The market broadened considerably and as a result of the steady advance in prices, many new high records for the year were made. The industrial stocks were conspicuous in the upward movement and U. S. Steel common reached the highest point since August 1911. We have referred above to the increase in dividend rates by the Anaconda Copper Co. and the United States Smelting Refining & Mining Co. The Southern Railway Co. also made an increase in the dividend on its preferred shares, a semi-annual payment of 2½% being declared, against 2% in April and 1% each in October and April 1911. This helped still further to stimulate the feeling of buoyancy, as also did the excellent returns of earnings for the month of August received from the Harriman roads and some other large systems.

VOLUME OF BUSINESS ON THE STOCK EXCHANGE.

Month of Sept.—	1912.	1911.	1910.	1909.

CONDITION OF THE TRUS COMPANIES OF NEW YORK STATE.

We present below comparative statements showing the condition of the trust companies of New York State at the date of the last call and of various previous calls since August 1907. We give separately the totals for the Greater New York and those for the whole State. We also add tables to indicate the changes in deposits for all the separate companies in the different boroughs of this city.

TRUST COMPANIES FOR WHOLE STATE OF NEW YORK.

NEW YORK STOCK EXCHANGE

MONTHLY AND YEARLY RECORD

The following tables furnish a complete record of the New York Stock Exchange transactions for the past month and the year 1912. They need no extended introduction, as they are self-explanatory. The tables embrace every security (excepting only State bonds) dealt in on the Exchange. We give bonds first, using the classification adopted in the official list. All quotations in the column headed *"Price about January 2 1912"* were made on that date, except those in italics, which are the nearest in January 1912. The black-faced letters in the column headed *"Interest Period"* indicate in each case the month when the bonds mature.

In accordance with the new rule adopted by the New York Stock Exchange, all quotations for interest-paying bonds are at a price to which accrued interest must be added. The exceptions to the rule are income bonds and bonds on which interest is in default. This method of quoting bonds became effective January 2 1909.

☞*For foot-notes to tables see last page of bonds and last page of stocks.*
